Professional Summary

Loves to dive deep and understand why and how something works.
Rapidly catching up to the latest technologies.
Currently focusing on frontend, trying to follow as many code practices to keep tech-debt low.
Grow together with everyone around me.
I know how to separate the nice-to-haves from the must-haves, and when to abstract logic.
I value readability for future-me and my team.

Work Experience

JUNIOR -> MEDIUM FRONT END DEVELOPER

Prorenata AB, Stockholm • 2019 - Present

- A medical application for schools across Sweden. Written in backbone.js.
- Migrating the codebase slowly to Vue (modular approach)
- Working inside a team of 25 co-workers, with specialised designers, testers, front- and back end developers
- Driving force behind improving processes and utilising modern tools
- Made a drag-and-drop template editor in Vue2
- Added the feature to add more users to an event on their custom Vue Calendar
- Also added features in their backbone.js app. Trying to utilise vue components whenever I could.
- Added a notification center in the backbone app, build with Vue2
- Made a custom support ticket app (Like zendesk) in Vue 2 + Composition API + Typescript

Academic Profile

KAREL DE GROTE UNIVERSITY COLLEGE, ANTWERP

Bachelor of Multimedia Technolog - Web & UX, 2016 - 2019

- My thesis was an online plug-and-play photo-booth application written in React and Node https://github.com/online-photobooth/online-photobooth
- Made a whole Nuxt frontend-focused E-commerce site. 'Pixel-perfect' https://github.com/jordypereira/kowloon
- Was Project leader in a squad of 4 developing a gaming console with a web platform where I got the highest grade. Maybe a future aspiration :)
- General UX, Teamworking, UI

Skills and Abilities

- Kanban, Srum, Agile, 6-week shape-up cycles
- Jira, ClickUp, Basecamp, Slack
- Pusher, Django, Buddy, Docker, ...
